CUBIC-Modulsystem A/S, Skjoldborgsgade 21, DK-9700 Broenderslev

To whom it may concern

Broenderslev, 12 October 2011
TFR

Dear Sir

We, CUBIC-Modulsystem A/S, hereby confirm that the company

Control Gostar Jahed Co.

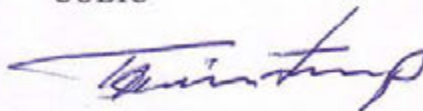

Domiciled at Unit 12, No. 159, Ferdos Blv., Sadeghiyeh Sq, Tehran, Iran has been trained and educated in the CUBIC modular system and thereby gathered the technical know-how and the ability to assemble type tested switchboards in Cubic's modular system.

All training and education are based on the CUBIC Global Training System and the standard documentation, which is in compliance with IEC 60439-1/EN 60439-1, low voltage switchgear and control gear assemblies, published by CENELEC.

Furthermore we confirm that Control Gostar Jahed Co., is authorized to design, assemble and supply low voltage switchboards and motor control centers using the CUBIC modular system under the agreement signed with CUBIC-Modulsystem A/S

We also confirm that Control Gostar Jahed Co., and CUBIC-Modulsystem A/S in October 2011 entered an agreement on Co-operation, and that Control Gostar Jahed Co. thereby became CUBIC authorized partner in Iran.

Yours sincerely

Subject

The main system of low-voltage switchgear and controlgear assemblies, type CUBIC Modulsystem, for maximum 6300 A with an incoming ACB, at a maximum 3-phase voltage of 1000 Vac 50 Hz, including the characteristic elements of the main construction of the modular system, such as the horizontal and vertical busbars, as well as the workmanship of the installed compartments.
The whole system is mounted in a closed sheet steel modular enclosure.

Note 1: This report does not cover the testing of the equipment generally mounted in the enclosure, such as switches, fuses etc.

Note 2: The values given in this report for the current rating of the busbar systems are valid for busbar systems loaded over the entire length and therefore they have to be considered as maxima for IP54 applications. In a completely installed switch board reduction of the current rating due to the temperature rise of the apparatus installed may be necessary. The reduction size shall be determined into practice by the manufacturer / assembler dependent on the number, the nature and the utilization of the apparatus installed.

Summary

This report is a summary based on a range of tests carried out by KEMA Quality B.V. on several configurations of low-voltage switchgear and controlgear assemblies, containing main and distribution busbar systems. The assemblies tested include incoming units up to 6300 A and outgoing units, fixed and withdrawable, equipped with several different brands of components up to 1600 A.

CUBIC

About CUBIC

CUBIC-Modulsystem A/S is a growth-oriented company, who develops, produces and sells a modular system for the construction of electrical switchboards. Our solutions are i.e. used within the industry, within mining and in airports. We supply solutions to ships, hospitals, power stations, windmills, and much more.

Since the very beginning the idea of a versatile modular system has developed CUBIC into a global and recognised partner within the electro-mechanical industry with a product range comprising enclosures for all purposes.

CUBIC is among the leading companies within our field and sells its products world-wide. The company is represented with subsidiaries in six countries and through partners in more than thirty countries.

The range of products includes:

- Modular system for the construction of electrical switchboards
- Bespoke solutions
- Customer designed electronic solutions
- Flexible copper bars

Partnering

CUBIC

Central to CUBIC is the concept of Partnering

Partnering is to CUBIC, the mutual belief that together, as partners we can achieve more than we can separately.

Partnering is the unique environment where a fulfilment of mutual needs takes place through a focus upon the values that we each bring to the co-operation. Values that are characterised by openness, loyalty, honesty, engagement, and the will and capability to develop the Partnering process.

CUBIC's contribution to the Partnering emanates from our set of values:

- The individual/the team
- Know-how
- Culture and attitudes
- Customer oriented
- Proactive
- Product concept
- Reliability
- Relations
- Independence

Our values are placed at the full disposal of our partners as a natural feature of this common environment.

Business foundation

CUBIC is based on an idea about a modular system, which via its fixed dimensions creates numerous combinations. Qualitative and creative thinking has opened an endless range of combinations. In return, this leads to more clarity, safety, and practicability in the day-to-day use in any type of enclosure.

Main objectives:

- To ensure a total growth, which is bigger than the general growth in the economies on the selected primary markets.
- That all our activities, internal and external, are in agreement with a planned, long-term, and controlled development with the purpose of securing our competitiveness.
- That we work on the basis of the conviction that there is a connection between our quality level, environmental attitude, efficiency, image, investment in the future, and our overall competitiveness.
- To be an attractive company for all interested parties (employees, customers, shareholders, suppliers, authorities, etc.), and that we recognise our social responsibility.

Vision:

We will create an international company, which is the natural choice, when selecting a business partner to enclosures for electrical switchboards.

We will do this through the actions, engagement and knowledge of our customers, suppliers and staff.

We are constantly engaged in enhancing and updating our systems and solutions. We are determined always to meet our customers' demands for user-friendliness and versatility.

In our highly dynamic work processes, we constantly add new resources and efficiency so that we can develop systems that meet the markets' demands for tomorrow's products.

Carefully selected, loyal and enthusiastic employees are an important part of the fulfilment of our goals.

Mission:

It is our mission as an independent company successfully to develop, produce and sell systems of a high quality and thereby contribute to secure electricity as a safe and reliable part of our everyday life.

Management

Since 1989, Torben Fristrup has actively participated in CUBIC's development, and he was in 1998 appointed managing director. In co-operation with director Jacob Møller Knudsen, who joined the company in 1996, he is the seminal figure for a dynamic and progressive management, who emphasizes a good and close relationship between the customers, the suppliers, and the employees.

CUBIC is an international company, building upon a strong network

International

It is not only the Danish customers, who have discovered the quality and unique possibilities with the CUBIC products. The wide range of products is also sold on the export markets in large parts of the world - including Europe, the Middle East, Africa and the USA.

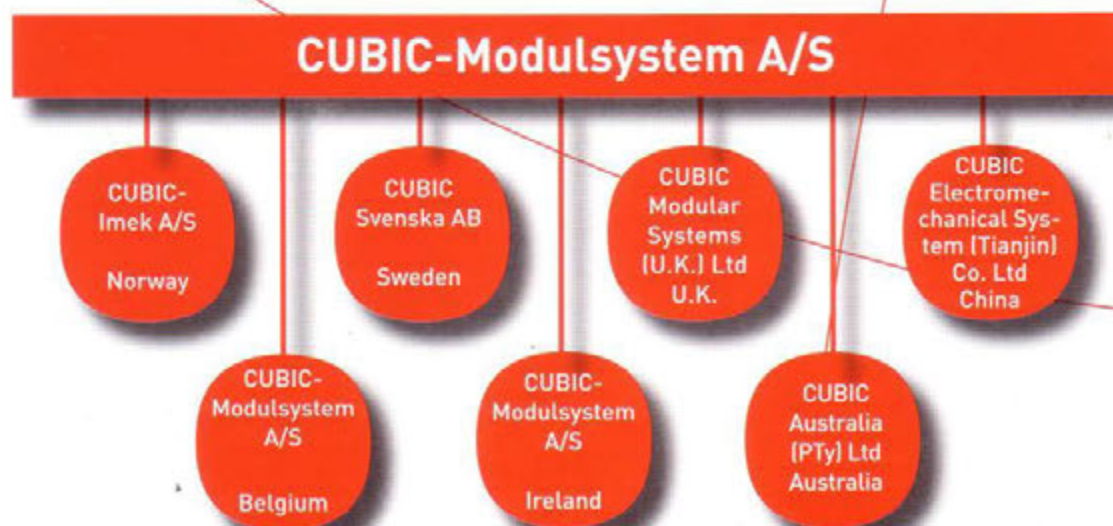

Beside its own subsidiaries, CUBIC has for more than thirtyfive years built up a strong network of business partners and established a strong foothold as a visible supplier of unique products.

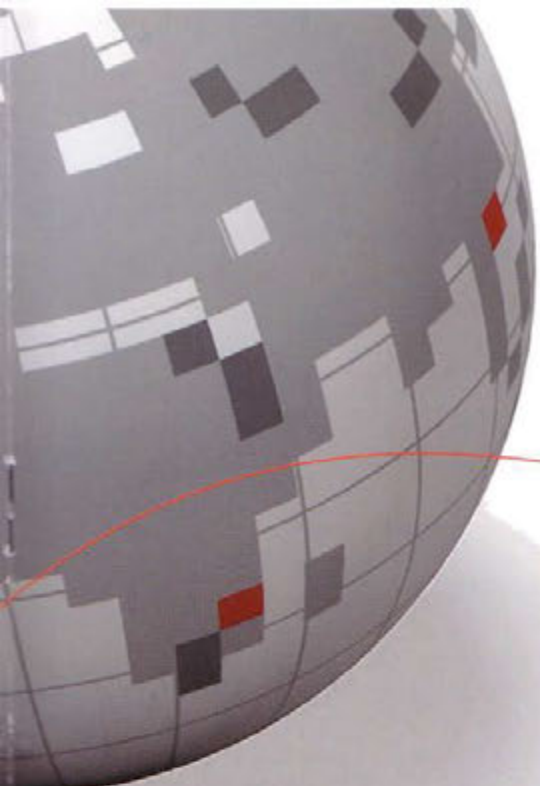

For several years, the markets in Europe and the Middle East have been attractive export areas for CUBIC. These areas will, together with the USA and Russia, remain interesting markets to CUBIC.

CUBIC is thus well represented on the international markets, and the goal is continuously to turn the market potentials to account by gaining market shares all over the world. Presently, CUBIC is represented worldwide through more than thirty highly skilled panel builders.

Subsidiaries

Throughout the years, CUBIC has increased export sales through its own companies and today has subsidiaries in Norway, Sweden, the U.K., Ireland, Belgium, China and Australia.

Overall supplier

CUBIC's drive and attention to details in development and innovation has today resulted in global recognition as a supplier of any kind of enclosure. Not only of the original modular system in steel, but also bespoke solutions for special purposes.

We are always attentive to the market development and aim to service our customers with products that cover new and current needs.

Suppliers

Quality throughout the finished product - and naturally delivered at the time agreed on. This is how CUBIC services its customers. To be able to meet our own high service standard, we solely co-operate with recognized suppliers, who can deliver raw materials of the best quality, and who have a professional and bona fide attitude to delivery times.

Through a close co-operation with our suppliers, we create optimum results, from which our customers benefit.

Transportation

Quality and safety are important keywords - all the way from production via transportation to the customer. All our products are packed with the greatest care, before the often long transportation by lorry, ship or airplane. We co-operate with transport companies all over the world. Our criteria when selecting a transport company is that it is capable of delivering the goods safely and on time - no matter the destination.

CUBIC guarantees high quality - from production to customer

Thoroughly tested and type approved

CUBIC produces high quality goods fulfilling all optimum safety requirements. Customers do not have to take only CUBIC's word for it. All the products have been tested and/or type approved by several of the most recognized test laboratories in the world - including the Dutch KEMA, the British ASTA, the American UL, the German Germanischer Lloyd, the Russian Maritime Register of Shipping and the Norwegian Det Norske Veritas (DNV).

With the comprehensive tests both CUBIC and its customers can be certain that the products fulfil all the requirements of the standards to personal safety in the finished panel.

ISO certification

To further emphasize CUBIC's commitment to documentation, quality and safety as our principal foundation, CUBIC-Modulsystem A/S and CUBIC-Imek A/S had their quality management system certified according to DS/EN/ISO 9001. The certification is a documentation that the company's quality management system complies with the requirements of the international standard DS/EN/ISO 9001. The certificate is a quality mark to the entire company's procedures, and the authorities constantly check that we maintain the stated requirements. This is a great advantage to our customers, who are thus ensured a service and a quality, which comply with the promised specifications.

The customer as partner

To ensure that all CUBIC products meet the needs and requirements as well as the function, to which the individual product is made, we see it as one of our most important tasks to build a partnership with the customer, end-user or consultant who use CUBIC's products.

Confidence between us as manufacturer on one side and the customer, end-user and consultant on the other is of major importance in the daily work to secure mutual goals, and achieve ultimate solutions that provide a foundation for future co-operation.

Close co-operation

It must be as simple and optimum as possible to design, construct and assemble with products from CUBIC. This is why we wholeheartedly place our knowledge, know-how and experience at the absolute disposal for consultants, customers and end-users, whether it concerns technical or practical questions.

We are of course ready to offer our services as a partner with advice and guidance for individual projects.

Information

Engagement, responsibility and constructivism in the shape of attractive proposals for solutions are not only our attitude in connection with actual projects. We are always ready with current information about relevant innovations, etc. which may be of interest to our business partners and inspire to new solution.
